Professional Summary

Computer Systems and Design student at PSG College of Technology with interests in software development, front-end development, AI-assisted applications, cloud technologies, and networking systems. Passionate about building practical projects, improving technical skills through certifications, and contributing to collaborative environments through leadership and event coordination.

Education

PSG College of Technology
B.Sc. Computer Systems and Design (CSD) — Second Year

Technical Skills

Programming Languages	Java, Python, C, C++, SQL
Web Technologies	HTML, CSS, JavaScript, Bootstrap
Core Concepts	Object-Oriented Programming, Operating Systems, Computer Networks, DBMS
AI & Cloud	Generative AI Fundamentals, Prompt Engineering, AWS Basics, Machine Learning Basics
Tools & Platforms	GitHub, VS Code, AI Studio

Projects

VertiSync Event Management System — Developed a role-based event and recording management system with dashboards, team coordination workflow, roadmap tracking, and communication features.

Client-Server Email System — Built a Python socket-based client-server email system with login, send, and read message functionalities using JSON-based communication.

Event Management Application — Designed an application to manage events, registrations, and team coordination efficiently using AI-assisted development tools.

Personal Portfolio Website — Created a responsive personal portfolio website using HTML, CSS, JavaScript, and Bootstrap to showcase projects, certifications, and technical skills.

Disk Scheduling Algorithm — Implemented and analyzed disk scheduling algorithms to improve understanding of operating system performance and disk access optimization.

Java Music Player — Developed a basic music player application using Java and object-oriented programming concepts.

Certifications

- AWS — Introduction to Generative AI: Art of the Possible
- AWS — Essentials of Prompt Engineering
- The Complete Full-Stack Web Development Bootcamp — Udemy

- NPTEL — Introduction to Operating Systems
- Python Programming Certification — Udemy (Ongoing)
- IBM Machine Learning Certification (Ongoing)

Leadership & Activities

- Active member of RadioHub Club, involved in organizing and collaborative activities.
- Served as Point of Contact (POC) for the final event of RadioHub, responsible for coordination between team members and participants.
